

**VOTE1,2,3**

Winnie Li

# Criteria

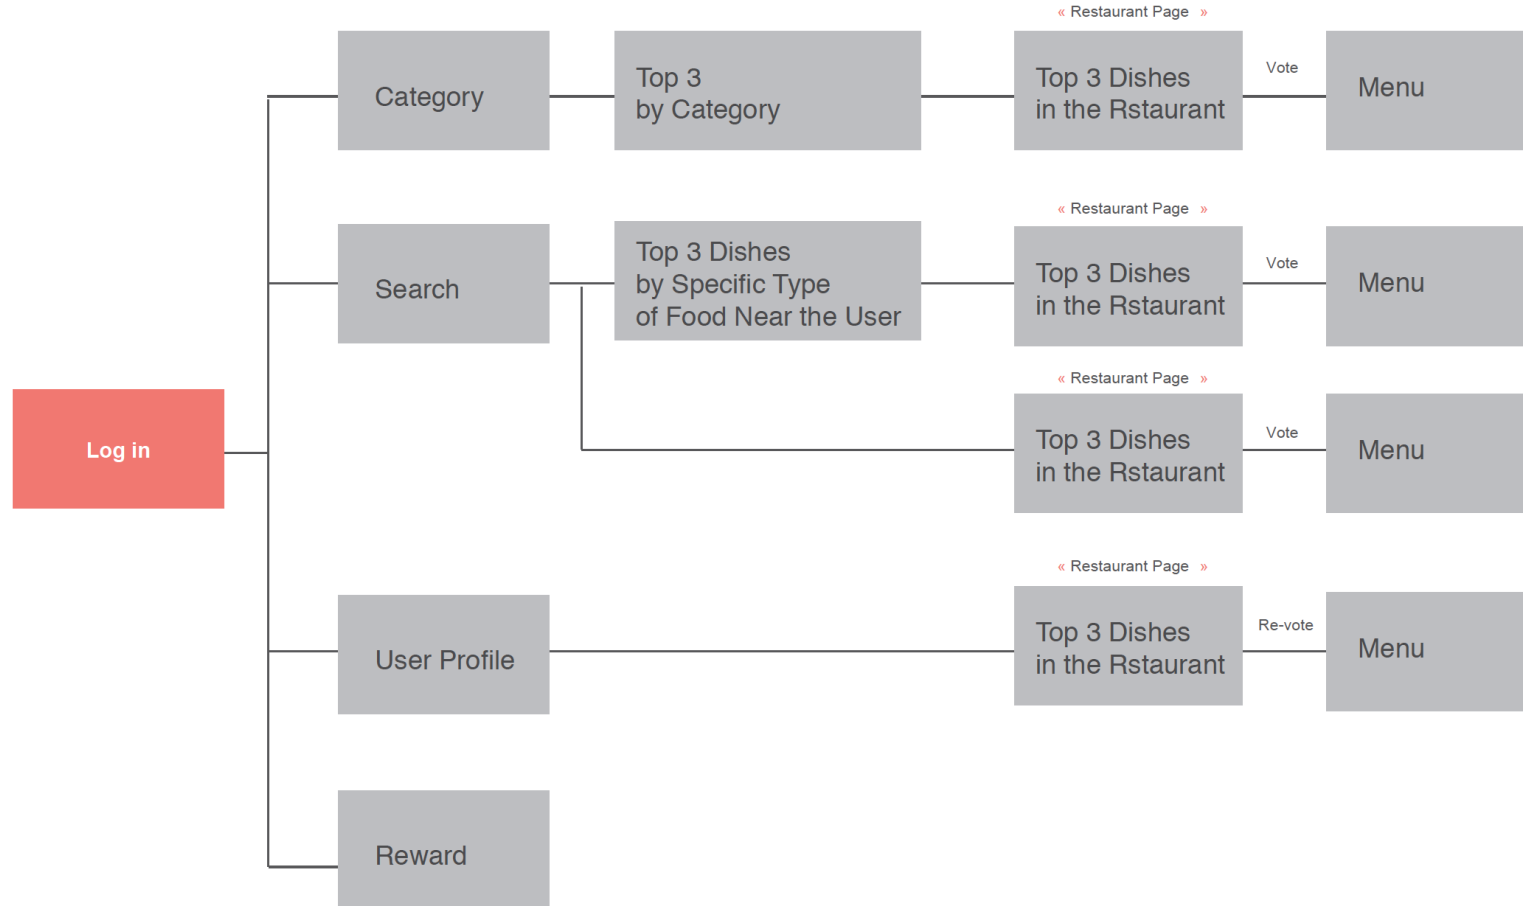

- A simple voting system for restaurant food review
- Users will see the current top 3 dishes in a restaurant
- if searching for a specific type of food, users will be shown the current top 3 restaurants with the food near them.
- Encourage users to vote with the rewarding system

# Target Audience

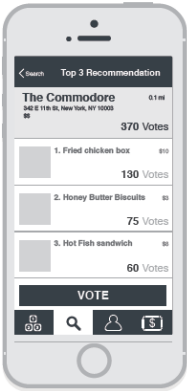

- Someone who wants to make the right order but doesn't have time to go through all positive and negative reviews on restaurant apps like Yelp
- your server is too busy to give a recommendation

# Precedents
